

700 of your Friends & Family **SAY NO** TO WAR IN IRAQ

IT IS UNJUST, UNNECESSARY, & COSTLY BEYOND MEASURE

The world is a hornet's nest and our President, George W. Bush, is beating it with a stick. Some people are cheering him on. They may agree with him, fear opposing him, or seek favors. Some are uncertain, oblivious, or in denial. Some question his motives, his strategy, and even his competence. Many choose silence. And now, many are protesting.

Meanwhile, with his attention focused on Iraq, most American citizens grow poorer, needs at home go unmet, the war on terrorism is weakened, and our friends abandon us. The United States' reputation changes from peacemaker to warmonger, and the world is becoming unglued.

PUBLIC OPINION CAN STOP THIS WAR

Call, Write, & Email your elected officials, local media, clergy, friends, & family.

Tell them, that like you, they should speak out in opposition to this war.

Why I took out this ad

I am prompted by feelings of frustration, outrage, and fear coming from an increased understanding of the "Bush Doctrine", as defined by his National Security Strategy (NSS). Far more radical than the administration's public statements, it boasts a willingness to act alone and use massive force in pre-emptive strikes (including the use of nuclear weapons) to neutralize regimes hostile to US interests. The NSS suggests using diplomacy and foreign aid to project American values by spreading democratic forms of government and open economic systems including "a battle for the future of the Muslim world." The doctrine also maintains that the U.S must exercise the necessary leadership to establish a new world order that convinces potential competitors that they need not aspire to a greater role. "Our first objective is to prevent the re-emergence of a new rival." Stated regions of concern include Western Europe, East Asia, the territory of the former Soviet Union, and Southwest Asia. Iraq is just the beginning. Remember, we're Americans- we're supposed to be the *good* guys. Source: <<http://www.pbs.org/wgbh/pages/frontline/shows/iraq/>> and <<http://www.sundayherald.com/27735>>

Although the doctrine was formulated before 9/11, President Bush, Paul Wolfowitz, Donald Rumsfeld and VP Dick Cheney are now able to use the support generated by that event to pursue their goals with reduced scrutiny. These goals are less about insuring security and spreading democracy than about concentration of power within the U.S. and dominance abroad – i.e. oligarchy and hegemony, two words increasingly being used to describe the priorities of this administration. I encourage you to listen critically, become informed and get involved. If we don't use our rights to know, question, and object, **we will lose them.** Curtailing such rights, here in the U.S., is another part of Bush agenda.
